EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lance Sadler on 5/18/2005.

The application has been amended as follows:

Cancel claims 1-19, 31-40, and 48-51

In claim 20, line 1 replace "**method**" with "**computer-implemented method**"

Allowable Subject Matter

2. Claims 20-30, 41-47 and 52-55 allowed.
3. The following is an examiner's statement of reasons for allowance: The previous obvious modification suggested that the HTTP verbs and the WebDAV verbs would each be represented by they're own servlet to modularize the data retrieval logic. However, Bayeh does not teach specific modules for each task, but rather only specialization the data servlet for each particular type of database (col. 8, ll. 52-55). Therefore, in any modification of Bayeh, each WebDAV or http command would be handled by the same servlet, or at least would not be tied to a servlet specific to it's function. In other words, Bayeh suggests using different data servlets for a Oracle database versus an MySQL database. It doesn't suggest using different servlets for two different queries within a single database, and therefore cannot suggest creating a separate object for each http or WebDAV verb it encountered.
